

Turn inspection data into uptime decisions.

OPERATIONAL PRESSURE

High utilisation, scarce maintenance expertise and fragmented machine data make it hard to distinguish real condition change from inconsistent rounds and disconnected alarms.

QUANTEON RESPONSE

Quanteon reconciles people, fixed monitoring, portable tools and mobile systems against a versioned baseline so maintenance teams can act on qualified evidence.

MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

Bottleneck equipment condition route

Thermal · vibration · acoustic

Compressed-air and steam loss survey

Ultrasound · thermal · context

Roof and elevated-asset survey

Visual · thermal · LiDAR

Safety and access verification

Video · access events · operator reports

IDEAL CUSTOMER PROFILE

- Plant and operations management
- Maintenance and reliability
- EHS, automation and digital operations

START WITH ONE MISSION

Baseline one recurring route around a bottleneck line, utility system or critical machine train.

ASSURED MISSION BASELINE

10 working days · CHF 25k fixed · no hardware purchase

SCOPE A MISSION
