

# Send evidence underground before people.

MINING

## OPERATIONAL PRESSURE

Ground conditions, dust, gas, mobile equipment and large remote footprints make inspection hazardous and make it difficult to preserve a consistent picture of rapidly changing operations.

## QUANTEON RESPONSE

Quanteon coordinates aerial, ground, fixed and human evidence around a living mine context, with mission limits, safe states and human authority made explicit.

## MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

### Underground gas and condition route

Gas · thermal · LiDAR

### Highwall and stockpile survey

Photogrammetry · LiDAR · visual

### Conveyor and crusher condition route

Thermal · vibration · acoustic

### Tailings and water-balance survey

Mapping · thermal · water level

## IDEAL CUSTOMER PROFILE

- Mine operations / technical services
- HSE, geotechnical and rescue
- Fixed-plant and tailings teams

## START WITH ONE MISSION

**Baseline one highwall, underground, conveyor or tailings inspection mission with a named decision owner.**

## ASSURED MISSION BASELINE

**10 working days · CHF 25k fixed · no hardware purchase**

**SCOPE A MISSION**
