

Qualified missions. Lower exposure. Defensible evidence.

OPERATIONAL PRESSURE

Nuclear teams must reconcile plant configuration, radiation conditions, specialist judgement and inspection evidence while maintaining strict authority, traceability and change control.

QUANTEON RESPONSE

Quanteon builds a living, versioned operating picture and qualifies each sensing mission against the asset state, route, payload, safeguards and named human authority.

MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

Primary-system condition route

Thermal · acoustic · 4K visual

Radiological area characterisation

Dose-rate · gamma spectrum · LiDAR

Containment high-bay survey

Zoom visual · LiDAR · thermal

Operator and fixed-sensor reconciliation

Rounds · historian · work context

IDEAL CUSTOMER PROFILE

- Plant operations and engineering
- Radiation protection
- Maintenance, outage and inspection leaders

START WITH ONE MISSION

Baseline one recurring thermal, acoustic or radiological route and the decision it must support.

ASSURED MISSION BASELINE

10 working days · CHF 25k fixed · no hardware purchase

SCOPE A MISSION
