

Find the leak. Prove the response.

OPERATIONAL PRESSURE

Distributed equipment, hazardous areas, ageing assets and intermittent inspection create gaps between alarms, field condition and the decision to continue, inspect or intervene.

QUANTEON RESPONSE

Quanteon correlates process context, fixed detection, mobile sensing and human observations in a governed mission record—without making the robot the decision maker.

MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

Compressor integrity route

Vibration · thermal · acoustic

Methane and VOC screening

OGI · laser gas · wind

Flare and stack survey

Long-wave thermal · zoom · LiDAR

Tank-farm assurance round

Gas monitor · thermal · fixed fusion

IDEAL CUSTOMER PROFILE

- Operations and production
- Mechanical integrity and reliability
- Process safety, methane and inspection teams

START WITH ONE MISSION

Baseline one compressor, pipe-rack or tank-farm route with explicit evidence and escalation criteria.

ASSURED MISSION BASELINE

10 working days · CHF 25k fixed · no hardware purchase

SCOPE A MISSION
