

# Keep cargo moving with evidence, not assumptions.

PORTS & TERMINALS

## OPERATIONAL PRESSURE

Ports combine open perimeters, vessels, cranes, hazardous cargo, ageing marine structures and continuous traffic—often across multiple operators and disconnected monitoring systems.

## QUANTEON RESPONSE

Quanteon aligns security, structural, environmental and operational evidence by location, time and authority so exceptions can be verified and acted on quickly.

## MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

### Quay-wall and berth survey

Imaging sonar · visual · geometry

### Crane and elevated structure route

Zoom · thermal · LiDAR

### Waterside security patrol

Radar · thermal · visual

### Perimeter and gate verification

CCTV · access · mobile response

## IDEAL CUSTOMER PROFILE

- Port authority and terminal operations
- Security, resilience and harbour master
- Marine structures, cranes and asset maintenance

## START WITH ONE MISSION

**Baseline one berth, quay-wall, crane or waterside-security mission with a shared decision workflow.**

## ASSURED MISSION BASELINE

**10 working days · CHF 25k fixed · no hardware purchase**

## SCOPE A MISSION
