

Every turnaround minute counts. Every line-up must be right.

OPERATIONAL PRESSURE

Hot equipment, dense pipe racks and constrained turnarounds make repeatable coverage difficult while mechanical-integrity evidence must remain current and defensible.

QUANTEON RESPONSE

Quanteon qualifies repeatable routes, fuses them with plant context and preserves the evidence, assumptions, exceptions and approvals behind every integrity decision.

MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

Heater and refractory screening

Thermal · zoom visual · LiDAR

Pipe-rack leak and corrosion route

OGI · thermal · visual

Tank roof and seal survey

OGI · visual · thermal

Compressor-train condition route

Vibration · acoustic · thermal

IDEAL CUSTOMER PROFILE

- Refinery and operations leadership
- Asset integrity and inspection
- Turnaround, reliability and process safety

START WITH ONE MISSION

Baseline one heater, compressor train, pipe rack or tank system before scaling coverage.

ASSURED MISSION BASELINE

10 working days · CHF 25k fixed · no hardware purchase

SCOPE A MISSION
