

Every substation, continuously mission-ready.

ELECTRIC UTILITIES

OPERATIONAL PRESSURE

Utilities manage distributed, ageing assets while critical replacements can take years and field evidence remains split across patrols, monitoring, weather and work history.

QUANTEON RESPONSE

Quanteon connects substation, line, vegetation and operator evidence to a living asset baseline and a governed inspect-or-intervene decision.

MISSION PORTFOLIO

Illustrative mission patterns · platform and payload subject to site qualification

Substation thermal and corona route

Thermal · UV · acoustic

Transmission-line inspection

Zoom · LiDAR · thermal

Underground-vault reconnaissance

Gas · thermal · visual

Storm and wildfire damage map

Mapping · thermal · visual

IDEAL CUSTOMER PROFILE

- Grid operations / asset management
- Substation and line maintenance
- Reliability, wildfire and resilience

START WITH ONE MISSION

Baseline one substation or line-inspection route tied to a maintenance or escalation decision.

ASSURED MISSION BASELINE

10 working days · CHF 25k fixed · no hardware purchase

SCOPE A MISSION
